https://github.com/GildedHonour/frank_jwt (Rust)

<https://github.com/gophish/gophish>; a contributor, "webhooks" functionality

<https://github.com/ezl/dailyidea.com>; a contributor (Python, Javascript, Vue.js)

<https://github.com/iterative/dvc>; a contributor (Python)

Languages spoken:

russian (native)

english (fluent)

español (basic fluency)

I've been working with variety of technologies, languages and people, mostly as a freelancer. And thus I'm capable of grasping new stuff faster. I like to work with algorithms, low-level stuff, math, crypto- and security-related things.

As of year 2020, one of the projects I've been working on is my own custom e-commerce store(s) with multi-tenant architecture and admin panel for them. I've built them from scratch.

I have my own projects and study things outside of programming realm.

Cheers :)
